Mobiaas™ is a mobile technology platform that provides comprehensive agrometeorological advisory services to poor and vulnerable communities, households, and individuals comprising of the poor, women, elderly, and those at risk of climatic change and extreme climatic conditions such as floods, diseases, and drought.

The platform acquires meteorological information from various sources using multi-model ensemble technique. The information is aggregated, organized, and analysed by an algorithm and a multi-disciplinary team. It is then sent out to the subscribed users in the form of data that is simple and comprehensible to enable users to make informed decisions.

About the Climate Information Prize (CIP)

CIP awards cash prizes to incentivise the development of innovative solutions and make climate information more accessible and useable for vulnerable individuals, households and communities. CIP is funded by UK Aid and works in partnership with the Kenya Meteorological Department.
