Well packaged climate information is especially useful in helping farmers to manage risks in what is already an exceptionally risky sector under which they operate and in reducing uncertainty that so often constrains their decision making. Our business idea involves linking climate information users with climate information providers in a system that enhances access to timely and highly practical information that is readily usable and relevant to their prevailing conditions.

We aim to establish an effective system that has the capacity to deliver a holistic package of climate related user information to the small scale farm holders within the eight villages of Visoi Ward, Rongai Constituency of Nakuru County including access to timely and usable climate information, soil sampling, and analysis, water harvesting, farm inputs, extension services, market information, energy harnessing (clean solar energy harvesting) and livestock breeding.

About the Climate Information Prize (CIP)

CIP awards cash prizes to incentivise the development of innovative solutions and make climate information more accessible and useable for vulnerable individuals, households and communities. CIP is funded by UK Aid and works in partnership with the Kenya Meteorological Department.
