Kyamatu Climate Smart Village is a one year pilot project targeting Kyamatu region. It will focus on enhancing community knowledge on basic climate information and access to localized climate information in order to make sustainable livelihood decisions for improved food security, water management and access to reliable energy source. The project aims to train the target community on climate information systems and assist them use climate information to make decisions that affect their livelihoods. The project seeks to;

- i) Improve knowledge and access to localized climate information;
- ii) Increase food production by 20% within 2 years as a result of using climate information;
- iii) Increase incomes from collective value addition and marketing of products advised by climate information;
- iv) Improve access to reliable water and energy sources.

About the Climate Information Prize (CIP)

CIP awards cash prizes to incentivise the development of innovative solutions and make climate information more accessible and useable for vulnerable individuals, households and communities. CIP is funded by UK Aid and works in partnership with the Kenya Meteorological Department. Find out more on www.climateinformationprize.org or follow us on Twitter @CIPrize
